

Here comes the full title of your work^{*}

Name1 M. Surname,¹ Name2 Surname,² and Name3 Surname^{1,3}

¹*A1 Affiliation, Address, Country,* email1@institution.edu

²*A1 Affiliation, Address, Country,* email2@institution.edu

³*A3 Affiliation, Country,* email3@institution.edu

This is the style template for the REDLOCA 2022 Meeting. Each submission should be at most two pages long, and give clearly the research question of the talk. You may organize it into sections, and include some figures or tables and references as follows.

1. Figures and Figure Captions

Please include all figures either in pdf, or in image formats as jpg, png, etc. Here are some examples of various kinds of figure captions that can be used with this style. They include the normal \LaTeX `\caption{}` as well as many more possibilities which you will see illustrated here.

The following example shows a regular caption.

Here is an example of a double caption; one figure with two² captions appearing side by side:

2. Making Tables

Notice that the caption should be at the top of the table. Use a line above the table, under the column heads, and at the end of the table. If you use the Kluwer command, `\spline` instead of the \LaTeX command `\hline`, you

²This is a sample footnote.

Figure 1. Oscillograph for memory address access operations, showing 500 ps address access time and $\alpha\beta\Gamma\Delta\sum_{123}^{345}$ superimposed signals of address access in 1 kbit memory plane.

Figure 2. This caption will go on the left side of the page. It is the initial caption of two side-by-side captions.

Figure 3. This caption will go on the right side of the page. It is the second of two side-by-side captions.

will get a little space added above and below the line, which will make your table look more elegant.

This form of the tabular command makes the table spread out to the width of the page.

Tables may use both the\sidebyside and the\letteredcaption command to position the tables side by side and letter the captions.

Using BibTeX for a bibliography

1. Sample Bibliography Using BibTeX

If you would rather make a bibliography using BibTeX write,

```
\bibliographystyle{plain}  
\chapbbblname{chapbib}  
\chapbibliography{logic}
```

and substitute the name of your .bib file for `logic` below. If you don't have `plain.bst` on your system, you can get it where you can find the book style files [1].

This will allow many BibTeX bibliographies in one book. This example shows the chapter bibliography using `\normallatexbib`.
