An analysis of the research area "Locational Analysis and Related Problems" through publications and citations is presented. All publications containing facility location or location problem terms in the title, abstract or keywords were searched in the ISI-Web of Science database.

A total of 1859 publications were obtained in the period 2000-2009.

The average citations per item is 5.65 and the h-index is 38.

Some results about production by institution, document type, year, country, journal, and research area are shown. Finally, most cited articles are analysed.
